Subject to technical modifications. Prices on request.
All orders are subject to our terms and conditions of sale.

As a quality certified company we guarantee constantly high quality standards. NORMA® products are manufactured using modern production techniques and high value materials. They are safe if used for the purpose specified by us and if our fitting instructions are obeyed. If you have any doubts about possible uses and the correct fitting please contact us for advice.

NORMACONNECT® FGR Pipe Connections

Perfect connections for pipes in various applications and materials.

NORMACONNECT® FGR pipe couplings are a compact, economical and reliable means for connecting plain-ended pipes. They are suitable to join plastic and metal pipes and especially pipes made from stainless steel. They can be used in mechanical engineering and construction, shipbuilding, civil engineering and in hydro technology.

Supply pipes as well as exhaust pipes for solid, liquid or gaseous media can be joined easily and safely in a very short period of time even in narrow spaces.

Thanks to the wide range of various types and sizes they are suitable for use both in standard and specialized applications.

NORMA® – Approvals

Certified and/or approved in compliance

Approvals

NORMACONNECT® FGR Product benefits

NORMACONNECT® pipe couplings are an economical alternative to conventional pipe joining techniques for both plastic and metal pipes. All plain-ended pipes can be joined easily by hand. The ready to fit coupling is pushed over the pipe ends and then aligned and rotated to any fitting position. Tightening the two bolts alternately with a torque wrench is all it takes to make a safe fitting.

- Sealing reliability is also ensured under the condition of slight axial misalignment, angular deflection and even gaps between pipe ends of up to 65 mm (cf. table).
- Pressure surges, vibration and related noise are absorbed to a considerable extent.
- Economy is guaranteed due to short assembly times without the necessity of prior pipe alignment or treatment of pipe ends; in addition, the pipe couplings are reusable.

Range of applications

The **NORMACONNECT®** pipe coupling is a reliable connection for thick- and thin-walled pipes which conforms to the latest DIN Standard 86128.

Feed and return lines for liquids, gas and solids (for mechanical engineering and construction, civil engineering, ship-building, pipeline construction, power stations, mining, filters, water technology, etc.) are joined quickly, easily and safely using **NORMACONNECT®** pipe couplings.

1. Double–lip sealing system

The patented double–lip sealing system (Fig. A) of the NORMACONNECT® pipe couplings offers double safety; It provides maximum sealability at both low and high operating pressures.

When the bolts of the coupling are tightened sealing lip 1 is pressed onto sealing lip 2, thus providing a highly reliable seal even under the condition of low pressures, vacuum or extreme loads acting on the joint (Fig. B).

The special sealing lip design means that when the internal pressure (P) increases, the sealing lips are pressed more firmly onto the pipe surface ensuring an even stronger seal (Fig. C).

2. Standard strip insert

All NORMACONNECT® pipe couplings are factory equipped with the standard strip insert (2).

The strip insert protects the sealing sleeve from increased mechanical and chemical loads.

It also prevents the sealing sleeve from moisture expansion and allows larger gaps between the pipe ends to be connected. Furthermore, it allows larger angular deflections and misalignment.

With the strip insert the couplings can also be used for both vacuum and high pressure applications without any problems.

The strip inserts are made from plastic material or stainless steel.

3. Heavy duty lock bars

For NORMACONNECT® pipe couplings we use lock bars (3) with a larger diameter. Thus the rigidity of the coupling is increased and the engagement of the threaded end of the locking bolts is considerably improved.

4. Anchoring ring with conically stamped teeth

The anchoring ring (4) with conically stamped teeth indents into the pipe surface and provides safe and strong axial restraint. Owing to the special design the coupling is able to withstand even high vibration loads.

5. Protection ring

The protection ring (cf. page 12) protects the sealing sleeve from UV rays, fire, etc. and increases the flexural strength of the coupling.

NORMACONNECT® FGR Type series

The NORMACONNECT® product range features the correct coupling for any conceivable application. The current range of pipe couplings comprises the following types:

NORMACONNECT® FGR – for axial non–restraint connections:

NORMACONNECT® FLEX/FLEX E
Axial non–restraint pipe couplings used to connect metal and/or plastic pipes

NORMACONNECT® FLEX 3
Axial non–restraint pipe couplings used to connect metal and/or plastic pipes; extra wide band

NORMACONNECT® REP E
Repair couplings used to connect and seal restrained metal and plastic pipes

NORMACONNECT® FGR – for axial restraint connections:

NORMACONNECT® GRIP/GRIP E
Axial restraint pipe couplings used to connect metal pipes with plastic pipes

NORMACONNECT® GRIP E-FP
Axial restraint pipe couplings with integrated flame protection used to connect metal pipes

NORMACONNECT® PLAST GRIP/PLAST GRIP E
Axial restraint pipe couplings used to connect plastic pipes

NORMACONNECT® COMBI GRIP/COMBI GRIP E
Axial restraint pipe couplings used to connect metal pipes with plastic pipes

NORMACONNECT® RFP
Retrofittable flame protection for axial restraint and none axial restraint pipe coupling

NORMACONNECT® FGR Materials

Components and materials in accordance with DIN standard

NORMACONNECT® pipe couplings are available in the materials W2, W4 and W5.

The support ring is only available in W5 material.

NORMACONNECT® FLEX/FLEX E

THE PROTECTIVE PIPE COUPLING

NORMACONNECT® FLEX /FLEX E pipe couplings are used for connecting restrained pipes. Both metal and plastic pipes can be connected safely and quickly. With NORMACONNECT® FLEX/FLEX E pipe couplings sealing reliability is also ensured under the condition of gaps between pipe ends which are compensated. Given outside pipe diameters of > 180 mm the FLEX type is suitable for high pressure and the FLEX E type for low pressure applications.

NORMACONNECT® FLEX /FLEX E Features:

- 1. Double-lip sealing system*
- 2. Standard strip insert*
- 3. Heavy duty lock bars*
- 5. Protection ring*

* For details refer to Product benefits pages 6–7.

²⁾ WP is the max working pressure in industrial applications, based on a safety factor as per NORMA specification.

³⁾ MAWP (maximum allowable working pressure) is the max. admissible working pressure in shipbuilding, based on a safety factor of ≥ 4 .

For the pipes to be joined the max. difference in diameter must not exceed 5 mm.

All pipe couplings ≥ 800 mm are in 2 parts.

Sizes > 1219.2 mm on request.

Higher pressures on request.

NORMACONNECT® FLEX 3

THE PIPE COUPLING WITH EXTRA WIDE BAND

NORMACONNECT® FLEX 3 featuring an extra wide band is an axial non-restraint coupling used to connect metal and/or plastic pipes quickly and safely.

NORMACONNECT® FLEX 3 Features:

- 1. Double-lip sealing system*
- 2. Standard strip insert*
- 3. Heavy duty lock bars*

* For details please refer to Product benefits pages 6–7.

¹⁾ WP is the max working pressure in industrial applications, based on a safety factor as per NORMA specification.

For the pipes to be joined the max. **difference in diameter** must not exceed 5 mm.

All pipe couplings ≥ 800 mm are in 2 parts.

NORMACONNECT® REP E

THE REPAIR COUPLING

NORMACONNECT® REP E are non-restraint repair couplings. They are used to connect and/or seal damaged metal and plastic pipes. They also enable repairs to be carried out easily, quickly and safely without the need to dismantle the pipes.

NORMACONNECT® REP E Features:

1. Double-lip sealing system*

2. Standard strip insert*

* For details refer to Product benefits pages 6–7.

NORMACONNECT® GRIP/GRIP E

THE STRONG PIPE COUPLING

NORMACONNECT® GRIP/GRIP E axial restraint pipe couplings are used to connect metal pipes. The anchoring ring with conically stamped teeth indents into the pipe surface (steel, stainless steel or cast iron) and provides safe and strong axial restraint. Owing to the special design the coupling can withstand even high vibration loads.

NORMACONNECT® GRIP/GRIP E Features:

1. Double-lip sealing system*
2. Standard strip insert*
3. Heavy duty lock bars*
4. Anchoring ring with conically stamped teeth

* For details refer to Product benefits pages 6–7.

¹⁾ **MAWP** (maximum allowable working pressure) is the max. admissible working pressure in shipbuilding, based on a safety factor of ≥ 4 .

²⁾ **WP** is the max working pressure in industrial applications, based on a safety factor as per NORMA specification.

For the pipes to be joined the max. difference in diameter must not exceed 5 mm.

NORMACONNECT® GRIP E–FP

THE FIRE RESISTANT COUPLING

NORMACONNECT® GRIP E–FP pipe couplings with integrated flame protection are used with applications in the marine sector (civil and military) as well as in sprinkler systems. For this purpose the GRIP E type has been equipped with an additional housing made from stainless steel plus a fire-resistant lining which can resist temperatures of up to 850°C. The pipe coupling meets the newest VdS directives, IACS P2.11 and ISO 19921/22. Sizes, pressures and dimensions on request.

NORMACONNECT® GRIP E–FP Features:

1. **Double-lip sealing system***
2. **Standard strip insert***
4. **Conically stamped anchoring ring***

* For details refer to Product benefits pages 6–7.

NORMACONNECT® RFP

RFP FOR APPLICATION AT SHIPBUILDING

The NEW NORMACONNECT® RFP is a retrofittable flame protection housing that has been specially designed for use with all NORMACONNECT® FLEX, GRIP and REP pipe couplings. Its low weight and straightforward design allows quick, easy assembly without any tools and the built-in flame resistant mineral fibre mat provides a premium level of flame protection.

The new Retrofit Flame Protection (RFP) housing has been extensively tested and is approved by Germanischer Lloyd. Approvals are also underway with Bureau Veritas, American Bureau of Shipping, Det Norske Veritas, Lloyd's Register RINA, Korean Register of Shipping, Russian Maritime Register of Shipping, Polski Rejestr Statkon and Nippon Kaiji Kyokai / Class NK.

- Flame resistant up to 850°C
- Retrofittable
- Easy assembly without tooling
- Low weight
- Meets IACS requirements
- No chemicals in flame protection mat
- High flexibility
- Clear identification whether coupling is flame protected or not
- Mechanical stress resistant
- Less warehousing costs

Enquiries/ordering

When making enquiries or placing orders please indicate
(Available in sizes 30.0 up to 406.4 mm):

1. The type (GRIP E–FP).....	GRIP E–FP
2. The required material (W5), (cf. page 10)	W5
3. The pipe outside diameter OD, (cf. table)	406.4
4. The sealing sleeve material (EPDM, NBR)	EPDM

For this example, the order text would read: NORMACONNECT® GRIP E–FP – W5 – 406.4 – EPDM

NORMACONNECT® RFP

NORMACONNECT® PLAST GRIP E

THE COUPLING FOR PLASTIC PIPES

NORMACONNECT® PLAST GRIP /PLAST GRIP E axial restraint pipe couplings are used to connect plastic pipes. The specially designed anchoring ring featuring flat rows of teeth engages into the pipe surface without damaging the plastic material. The force applied is distributed evenly across the pipe surface.

NORMACONNECT® PLAST GRIP /PLAST GRIP E Features:

1. Double-lip sealing system*
2. Standard strip insert*
3. Anchoring ring*

* For details refer to Product benefits pages 6–7.

6. Optional support sleeve

When joining plastic pipes made from PE and PP a support sleeve must be used. If the pipes to be joined are made from soft thermoplastic material (e. g. PE) the use of a support sleeve is mandatory. The support sleeve is inserted into the pipe end within the area to be joined and thus protects the pipe from being deformed.

Enquiries/ordering

When making enquiries or placing orders please indicate:

Example:

¹⁾ PN (nominal pressure) is the max. admissible working pressure in shipbuilding, based on a safety factor of ≥ 4 .

²⁾ WP is the max. working pressure in industrial applications, based on a safety factor as per NORMA specification.

NORMACONNECT® COMBI GRIP E

THE COMBINING PIPE COUPLING

NORMACONNECT® COMBI GRIP/COMBI GRIP E axial restraint pipe couplings are used to connect plastic pipes with metal pipes. For the plastic pipe the coupling features on one side a special anchoring ring with rows of flat teeth which are pressed into the pipe surface without damaging the material. At the same time the force applied is distributed evenly across the pipe surface. For the metal pipe the coupling features on the other side an anchoring ring with conically stamped teeth which grip into the pipe surface. Due to the special design of the anchoring ring the coupling can withstand even high vibration loads.

6. Optional support sleeve

When joining plastic pipes made from PE and PP a support sleeve must be used. If the pipes to be joined are made from soft thermoplastic material (e. g. PE) the use of a support sleeve is mandatory. The support sleeve is inserted into the pipe end within the area to be joined and thus protects the pipe from being deformed.

NORMACONNECT® COMBI GRIP/COMBI GRIP E Features:

- 1. Double-lip sealing system*
- 2. Standard strip insert*
- 3. Anchoring ring*

* For details refer to Product benefits pages 6–7.

Enquiries/ordering

When making enquiries or placing orders please indicate:

Example:

- | | |
|---|------------|
| 1. The type (COMBI GRIP/COMBI GRIP E) | COMBI GRIP |
| 2. The required material (W2, W5), (cf. page 10) | W5 |
| 3. The pipe outside diameter OD, (cf. table) | 88.9/90 |
| 4. The sealing sleeve material (EPDM, NBR) | EPDM |

For this example, the order text would read: **NORMACONNECT® COMBI GRIP – W5 – 88.9 – EPDM**

"NORMA Group is a strategic development partner and global solution provider of Engineered Joining Technologies. Our Distribution Services combine the world's leading brands in standard hose and pipe fastenings with unrivalled applications expertise in areas such as Emission Control, Cooling System, Air Intake & Induction, Ancillary System and Infrastructure"

The NORMA® Product Range

- **NORMACLAMP®**
= Hose Clamps
- **NORMACONNECT®**
= Pipe Connections
- **NORMAFIX®**
= Retaining Products
- **NORMAQUICK®**
= Quick Connectors
- **NORMAFLEX®**
= Fluid Systems
- **NORMAPLAST®**
= Plastic Products
